Company Overview

ICC Software is an SBA 8a/SDB certified company, and our aim is simple: to develop innovative software products that are comprehensive, customizable and user-friendly. Through extensive research and an advanced coding process, we have created a wide range of software and server solutions that truly meet the needs of our customers. ICC Software was started in 2001 by Anthony Johnson, an experienced software engineer. The company has created software solutions and consulted with Fortune 500 companies and government agencies, such as ABN-AMRO Bank, CSX/Horizon Lines Shipping, the United States Marine Corps and the Department of the Navy.

Our products have been developed to accommodate small to large businesses and Government entities as well.

Our Services

ICC Software specializes in project management, biometrics, mobile applications, and document conversion proprietary software. Because ICC Software has developed these products, we are able to enhance our proprietary applications, and deliver your requested solution quickly, modify the applications to your specifications, construct a robust architecture that can be built upon quickly for any future needs that you may have, and give you one to one support and maintenance without any third-party entity. ICC Software can offer an added layer of security that other solutions may not be able to provide with our biometrics software. We also offer other custom development solutions in the following programming languages and services:

- ASP.NET
- VB.NET
- VB6
- MS SQL Server 2000/2005
- Oracle
- Java
- Project Management

Releasing Q2 2009: On Time and On Budget® – On Time and On Budget, is our new web-based full life-cycle project management tool that allows users to subscribe and utilize tools to help them track their complete construction, IT, or any variety of projects. Clients can pick the modules that best fit their needs, such as project management, document management, issues tracking, time-entry, resource management and several other complete management tools.

Guardian Mobile Inspection System® - Enterprise:

Ideal for: Small/Medium/Large corporations, Federal, State or Local Governments.

The Guardian Mobile Inspection System® is a comprehensive web-based application that allows for incredible customization, organization, and mobility. It is compatible with PDA's, Tablet, and Handheld computers that support the Windows Mobile™, Windows CE™, or Pocket PC™ operating system. With the GMIS application your employees can easily and quickly inspect any city vehicle for maintenance and find issues before they start. GMIS is adaptable for the following types of inspection programs:

Vehicle Inspections -

- Brake Inspections
- Tire Tread Depth
- Refrigeration Units
- Lubrication
- Tire Pressure
- And More!

Releasing Q2 2009:

Health Code Inspections Modules -

- Food Inspections
- Swimming Pool Inspections
- Complaints
- Industrial pretreatment
- Vector control
- Body Art
- Liquid Waste

For more information or to setup an online demonstration of the Guardian MIS, please call 214-227-9559 or send an email to ajohn@iccsoftware.net. Discounts are available to Government entities.
